**Target Role:** Project Manager

### **Professional Summary**

PMP- and ITIL-certified Project Manager with 12+ years of experience delivering multimillion-dollar programs in corporate, government, and compliance environments. Adept at managing full project lifecycles, from planning and budgeting to risk mitigation and stakeholder engagement. Skilled in vendor and contract management, governance, and cross-functional leadership, with a proven record of completing projects on time, within budget, and to safety/quality standards. Strong communicator who partners effectively with executives, business units, and external stakeholders to align projects with organizational goals.

### **Technical Skills**

Project Planning & Execution | Budgeting & Cost Control | Risk & Change Management | Vendor & Contract Oversight | Governance & Compliance | Stakeholder Engagement | Business Process Improvement | Team Leadership | MS Project | Jira | ServiceNow | Confluence | Smartsheet

### **Professional Experience**

#### **Warner Bros. Discovery / Turner Broadcasting – Atlanta, GA / Remote**

##### **Project Manager / IT Engineering Manager | Feb 2018 – Apr 2024**

Directed enterprise-wide initiatives and multimillion-dollar programs, balancing scope, schedule, and budget while maintaining operational continuity. Partnered with executives, finance, procurement, and business units to align projects with organizational objectives.

- Managed a \$30M enterprise program, coordinating scope, contracts, and vendor oversight to deliver infrastructure and organizational outcomes with zero disruption to operations.
- Standardized project workflows and reporting through JIRA and MS Project, resulting in a 20% efficiency gain and 25% fewer delays.
- Negotiated service agreements and vendor contracts, achieving 15% cost savings while maintaining quality standards.
- Facilitated stage-gate reviews and governance processes, ensuring compliance with PMO frameworks and corporate policies.
- Developed executive-level reports and presentations on budgets, forecasts, and risks to enhance decision-making.
- Directed cross-functional teams of 6–8 professionals, increasing delivery capacity and reducing overtime burden by 20%.
- Supported organizational change management initiatives by providing training, process documentation, and risk assessments, improving adoption and reducing incidents by 25%.

## **Key Achievements:**

- Expanded program value by \$4M through integration of new initiatives into the existing portfolio.
- Strengthened risk management and governance practices, leading to a 20% reduction in incident reports.

## **Technical Supervisor – Project Lead** | Jul 2012 – Feb 2018

Oversaw medium- to large-scale projects across a multi-building campus. Directed contractors and internal staff to ensure alignment with scope, schedule, and safety/quality standards.

- Chaired the Change Advisory Board (CAB), mitigating project risks and enforcing governance requirements.
- Managed site upgrades and refresh projects, completing multimillion-dollar efforts without service disruption.
- Implemented standardized project lifecycles and compliance processes, reducing errors by 25% and sustaining 99.9% uptime.
- Partnered with stakeholders across business units to ensure alignment of projects with operational needs.

## **Production Engineer** | Jul 2008 – Jul 2012

Executed operational projects and workflow automation efforts to improve efficiency and service reliability.

- Automated data transfer and reporting processes, saving 20+ hours weekly in manual work.
- Created and maintained documentation that improved compliance readiness and reduced recurring issues.
- Ensured system reliability and operational support for 24/7 business-critical environments.

## **Senior Support Technician (Contractor, CDC)** | Jan 2000 – Jul 2008

Provided project and operational support in a federal compliance environment.

- Delivered IT and operational support for research and administrative teams, resolving 95% of tickets within SLA.
- Managed asset lifecycle processes as Property Custodian, ensuring compliance with federal standards.
- Supported the transition to a secure high-speed infrastructure, improving compliance and efficiency by 25%.
